Startup times Running speed We tested the dictionary files using a Kindle Paperwhite e-ink ebook reader. You can find all the Kindle devices tested on this page. We ran the test several times and took the average of the results. The times vary slightly each time you load the dictionary file, but the difference between loading the dictionary for the first time and loading it 200 times is negligible. Important: We compiled our own Kindle dictionary file by manually entering words and definitions, and it is safe to assume that it is not an exact copy of Amazon's dictionary. However, it has a large selection of words and definitions, and is easy to use. Dictionary format Our dictionary file is for Kindle UK, US, FR and IT. You can find a full list of supported languages on the site. We compiled the dictionaries for all the languages by hand, so you may need to download and open the dictionary separately. The dictionary files are compatible with Kindle for Android, Kindle Fire and Kindle Paperwhite. Running times We tested both Kindle dictionary files (DK1.txt and DK2.txt) using the Kindle Paperwhite, Kindle Fire and Kindle for Android. The Kindle is plugged into a power outlet with a stable Wi-Fi connection to avoid introducing any variability. Our test was performed using all three dictionaries turned on in the device
