Technorati and Hi5. Kostik comes with a lot of features and benefits and is among the best business promotion applications on

#### What's New In Torxy?

Torxy provides users with a way to make their Internet browsers stealthy by utilizing the Tor protocol. The Tor protocol provides a network that allows users to browse the Internet anonymously by making their IP addresses look like a range of random numbers. Torxy helps its users by creating a virtual “proxied” network on their machines, and offers an easy to use interface that comes packed with an intuitive layout and easy-to-follow steps. Within just a few mouse clicks one can activate the Torxy protocol and take advantage of the Tor network. Torxy works with Internet browsers and supports all major browsers such as Chrome, Mozilla Firefox, IE, Safari and Opera. Torxy includes a tray icon application that can be launched whenever the user wishes to make their browser or system Tor. People can also set a “watchdog” option that will help in determining if Torxy is working or not. The Torxy interface is simple and light, and it doesn't require any configuration and is

---

accessible at all times. One need not be concerned by extra processes as the application will just set up a virtual network, and one will be able to just use the Internet as the way they used to. Torxy includes an extensive set of features that will allow their users to feel safe when browsing the Internet. The protocol is backed by solid security, as it is located in a special Tor directory and controlled by a monitoring application. The interface will also include a feature that will keep tabs on the status of the Tor network, and additionally, the software will display a warning sign when a connection to the application has been lost. [caption id="attachment\_1930" align="alignright" width="221" caption="Torxy installation"] [caption] Features of Torxy: - Completely Clean Interface - Saves the configuration in the registry as default - User friendly interface - Interface can be launched as tray icon or at system startup - Does not require configuration - User Friendly - Provides a real-time tracking of the current Internet connection status - High tech security - User is provided with an option to "Watchdog" - User can set a "Watchdog" timer - User can set a "Watchdog" threshold value to determine the network status - Enhanced - Removal of the need for separate applications - Stealthy
