Flash Album Creator Screenshots Publisher's description: Flash Album Creator is a program that you can use to basically create a Flash animation from your favorite pictures. The software comes with a user-friendly interface in which you can import images via your file browser only, because the "drag and drop" method is not supported. So, you can get started by configuring global settings which revolve around the frame rate, width and height, background color, URL link, background music, preloader and navigation panel. Now you can select the transition type that you want to apply (to all slides or just the selected ones), such as shape diamond, split vertical out, strips left-down and wipe up. Don't forget to set the transition duration as well. Furthermore, you can set Flash Album Creator to place a picture in a particular position, at the start or end point. Plus, you can add text, set its position, font style, size and attributes, as well as specify the duration of the selected slides or entire animation, along with narration and a URL link if necessary. Before saving the project and publishing the Flash file, you can preview results (it may take a while for the animation to load, according to its duration). The program takes up a low-to-moderate amount of system resources, contains a well-written help file with snapshots for beginners and ran smoothly during our tests. We haven't encountered any problems whatsoever. Unfortunately, the unregistered version displays a watermark right in the middle of the animation. Otherwise, we strongly recommend Flash Album Creator to all users, especially novices. What is new in this release: Easy to use the new interface.
