By John Iverson Go to the dining room Thursday. Look out the window at the empty parking lot. Examine the menu. Warm yourself in the restaurant's fireplace. Those basic instructions should suffice for customers seeking a warm welcome -- offering good food and good service -- in such dining rooms as the Bishops' Burger Bar and Windham's Riverside Gallery & Tavern. But not in the former Fate restaurant at the corner of Church and Third Sts. Bishops' is owned by Tim and Lisa Schreiber, lifelong residents of Lynn, Mass. They operate their own Dorchester eatery -- the Schreibers' Deli -- on Fourth Street. Former owner Herman Schreiber chose to close Bishops' last fall after 11 years in business. "I wanted to follow my father's lead, who chose to be an Episcopal priest," Herman explained. "I ended up having children, so I had to make the difficult choice of abandoning the priesthood. My father remained an Episcopal priest, so Bishops' felt like home even though I wasn't there." Lisa Schreiber says her husband liked to work with a kitchen full of people. "He was always tinkering at home trying to come up with new recipes, and he worked in retail for years. He didn't want to be the one to try new things," she says. Dreadtides is a post-apocalyptic city builder. The game takes place in a fantasy world that has fallen under the corrupting

influence of Dreadtides, a dark magical force that has corrupted nature and people alike. While this apocalypse has consumed all other life, transforming people and animals into nightmarish creatures that further spread corruption, these monsters have found you, the last remaining survivors. The player will lead the surviving remnants of this world on a journey to defeat the corruption that has overrun the land. The gameplay is set in a world where they are constantly in danger of being discovered by the monsters. The game mechanics are built around exploration, discovery, defence, and combat. How To Play: To play the game, simply click to create and manage the structures that make up your settlement and city. You'll start out having a wooden house in a small valley, but can expand with more houses, shops, and production. To manage you buildings, you'll need to research and build them. The game uses a combination of turn-based and real-time mechanics, so that you don't have to worry about getting your orders delayed. You'll discover new buildings by researching technologies, and you'll build new ones by having villagers working in your various greenhouses, shops, and armories. To build your town, you'll gather raw materials from the terrain and turn them into finished goods in your factories. Then, you'll be able to craft new buildings with those materials, or improve existing ones. New buildings can be crafted with raw materials. The player can make their own buildings out of existing or blocky prefabs, but must pay the cost, and the building will be more expensive in the beginning of the game. By researching and crafting your buildings, you'll upgrade them and make them more powerful. On the map is a game timer that reflects the time you've spent playing the game. The longer you spend, the more likely you are to achieve the goals you've set for yourself. So, if you wish to farm, you need to guard your crops from monsters, build workshops, and build a farm that will grow more crops than those eaten by your monsters. There's a battle bar at the bottom of the screen that shows the progress of both you and the monsters. The more time the player spends doing something, the more they gain experience. The player will gain more experience by killing corrupted monsters and performing actions that increase their combat ability. The monsters gain
