## **System Requirements:**

As with any other Deadlight mods, you'll need to have Skyrim installed. For all the reasons mentioned above, you'll need to also have Dawnguard. It is, however, only recommended if you're doing mods that are going to be compatible with Dawnguard, as I did not test this mod with Dawnguard installed. You may be in for a surprise if you update your Skyrim, as some of the items you'll need for this mod may not be available through normal means. and that you're willing to make a few changes to the.ini files of the mods
