Now it's more than 100 years since the fall of the Black Fortress. Those who escaped from the Black Fortress are now scattered in the Lands Between. In this vast world, most young Elden have their destinies set, but a handful of those still retain the dreams of their forefathers, and they still seek the location of the Black Fortress. Players can choose from four main characters - an assassin, a magic-user, an adventurer, and a swashbuckler. As they progress in the game, they will acquire a variety of skills, like fighting and magic. Players can advance on their own, or party with up to four characters, by providing them with

missions and skills. **FIGHT WITH INTENSE PHYSICS:** An outstanding physics engine for real-time battles was developed for this game. The rigid and realistic feeling of the combat action is directly connected to the world through a physics engine that is capable of handling the enormous number of actions in a fight. It generates a rich and complex animation, with collision detection that is accurate, stable, and responsive.

ENHANCED ONLINE MULTIPLAYER: A variety of multiplayer options are available. Players can gather together to compete in various battles, or join forces in extensive online adventure maps, or in party-based quests.

ELEGANT ICON AND CUSTOMIZATION:

You will Like this Game. Its Best Action RPG. In the run-up to Tuesday's NHL trade deadline, the Toronto Maple Leafs will have the chance to add assets they can dump at the deadline, in a year when they're still trying to move Dion Phaneuf's massive salary. The Leafs have an issue to deal with. They've got some assets (through Martin Marincin and Luke Schenn) and a lot of cap space. But none of these would matter if it wasn't for the looming trade deadline, a quirky but wholly real part of hockey that describes a players' best-case, worst-case scenario by moving a player at the absolute bottom of his ice time allotment and releasing him in March rather than late July. So it's time to start taking a look at the Leafs' buy and sell candidates, because with a healthy chunk of cap room this year, they're going to need a fair chunk of players. We turn now to buy, the players who matter. The buy candidates fall into four categories, and the four categories are... Acquired for a draft pick Retention assets acquired in a trade with another NHL team Acquired for a player not on

long-term contract Acquired for a player on long-term contract who is under contract for two more seasons The Leafs have four of each. And that's the problem. They have a buyer in Jonathan Bernier, and he's almost certainly not going anywhere. Then there's Jake Gardiner, who the Leafs just bought out of his entry-level contract, which means he's gone unless they resign him or extend him. The Leafs made a big splash in the off-season by qualifying Johnny Gaudreau to receive a waiver to NHL All-Star Game, making him a Leafs. Being a Maple Leaf means more here than it would elsewhere, but less than it used to. We'll get to players whose names you've already seen in a minute. But first, we'll take a look
