**Gta532bit3dmcrackforums ((INSTALL))**

---

Some of those above said that it is a null pointer exception, and I read some articles about null pointer exception and what it means, but it did not clear me up. I have 2 questions. 1: How can I fix this null pointer exception error? 2: Is there any way to stop it from asking me if I want to restart my PC? A: The script I used to solve the problem is:

```
def get_started():
    if not os.path.exists("Programs"):
        os.mkdir('Programs')
    if not os.path.exists("Programs/AVG"):
        os.mkdir("Programs/AVG")
    if not os.path.exists("Programs/AVG/Svchost"):
        os.mkdir("Programs/AVG/Svchost")
    if not os.path.exists("Programs/AVG/Svchost/Service.exe"):
        os.mkdir("Programs/AVG/Svchost/Service.exe")
    if not os.path.exists("Programs/AVG/Svchost/Service.exe/service.exe"):
        os.mkdir("Programs/AVG/Svchost/Service.exe/service.exe")
    if not os.path.exists("Programs/AVG/Svchost/Service.exe/service.exe/config"):
        os.mkdir("Programs/AVG/Svchost/Service.exe/service.exe/config")
    if not os.path.exists("Programs/AVG/Svchost/Service.exe/service.exe/config/updateSettings"):
        os.mkdir("Programs/AVG/Svchost/Service.exe/service.exe/config/updateSettings")
    if not os.path.exists("Programs/AVG/Svchost/Service.exe/service.exe/service.exe/service.exe/config/updateSettings"):
        os.mkdir("Programs/AVG/Svchost/Service.exe/service.exe/service.exe/service.exe/config/updateSettings")
```
