N73 Arabic Flash File V4.0850

Is there any option to replace the text inside a part of a flash file? I'm working on a project where we have a mountain of templates that we need to replace in order to use them. The templates have static text (such as a badge name) that we would need to insert into many points in the.swf. I can't find an option or anything in the preferences to either delete or duplicate the text inside a part of the flash file.

#FlashPages# Is this compatible with a Chinese ROM? I bought a retro N73 on ebay for the 1st time in my life. The N73 has been produced by Chinese in Shenzhen. I'd like to know if this is compatible with a Chinese ROM so that I could have the opportunity to try it out. If anyone can shed some light on this.

#FlashPages# I have a path-to-PC-program and another path-to-PC-ROM but I really don't have any idea what to do now. I have removed them both from the system and still the program cannot find them. I also tried to reinstall and it made no difference. Now I have no clue what to do. I have been trying to fix this problem for days and can only get so far. Any help would be appreciated!

#FlashPages# Is there any way to replace the Flash auto text with a text that is set using textObjects? So that I don't need to have a copy of auto-generated text in every part of the file that has to have it.

#FlashPages# Hi, I've upgraded to the new auto text engine and am seeing that all of my text is red tagged. I've attached an image of what this looks like. I've tried to export the text as a swf but it doesn't work. It just gives me a file with the fla extension. If there is

any fix please let me know. #FlashPages# 5ec8ef588b
